Bruening, Wendy	Montreal		CA	
Darveau, Andre	St. Foy		CA	

US-CL-CURRENT: 514/12; 424/185.1

CLAIMS:

What is claimed is:

1. A pharmaceutical composition comprising an isolated polypeptide comprising the amino acid sequence of SEQ ID NO.: 5 in combination with a pharmaceutically acceptable carrier.
2. A method for treating a cancer or precancerous condition associated with the Wilms' tumor gene in an individual comprising administering to said individual a therapeutically effective amount of a composition according to claim 1.
3. The method of claim 2 wherein the cancer or precancerous condition is selected from the group consisting of: Wilms' tumor, leukemia, testicular cancer and ovarian cancer.
4. A composition comprising an isolated polypeptide comprising the amino acid sequence of SEQ ID NO.: 5, wherein said composition is suitable for use in inducing an immune response.
5. A composition comprising an isolated polypeptide comprising the amino acid sequence of SEQ ID NO.: 5, wherein said composition is suitable for use in inducing an antibody response.

6. A method for inducing an immune response in a mammal comprising administering to said mammal an effective amount of a composition comprising an isolated polypeptide comprising the amino acid sequence of SEQ ID NO.: 5.

7. The method of claim 6 wherein the immune response results in inducing antibody production.

8. A method for inducing an antibody response in a mammal comprising administering to said mammal an effective amount of a composition comprising an isolated polypeptide comprising the amino acid sequence of SEQ ID NO.: 5.
